Experience

Lead Organizer, HackBloomfield – 2017-Present
After having attended numerous hackathons (24- or 36-hour programming competitions held at high schools and universities), I decided that it could be beneficial to hold one at my own school. I began to put together an organizing team, and the event is set to occur next spring.

Full Stack Web Developer, Orbit Management - 2017-Present
My parents, who work for a management company which manages homes in Redford, MI, placed me in charge of creating a simple website to display the company's listings and provide a dashboard for tenants. I developed it using Vue.js for the front-end and Express for the backend.

Full Stack Web Developer, NAPS - 2016
I was in charge of putting together a website for the 2016 North American Polyglot Symposium in Montreal. I used React for the front-end, and a simple Express server for the backend.

Education

Bloomfield Hills High School; Bloomfield Hills, MI – 2020
4.0 GPA (as of June 2017)
AP Classes:
  - AP Computer Science Principles (score to be released)

Skills

- Front-end Web Development
I have experience working with numerous frameworks, including React, Angular, and Vue.js for front-end web development.
- iOS Development
I have been working with iOS development in Swift for around a year now. More recently, I began working with Objective-C, so I am able to work on older apps that still do not use Swift.
- Language
I am a bilingual native speaker of English and Hebrew. Additionally, I am conversational in Italian, Spanish, and French, and have studied various other languages at different levels, including Mandarin and German.
